Diego Andino

For the past 2+ years, I have been reporting to my manager, Reza Sarijlou, about issues that I have seen with Diego Andino skipping out on work or not working when he should be. It actually started 4 years ago when we reported to Garth Devries but I never said anything until after we were reporting to Reza. Diego is open about the fact that he has a 2nd job working for a startup. He has mentioned multiple times that he is their only Dev and it keeps him busy. His personal website and resume both reflect this:

EDUCATION

M.S in Computing • Secure Computing

University of Utah — *Salt Lake City, UT*

B.S in Games & Minor in Computer Science

University of Utah — *Salt Lake City, UT*

SKILLS

Programming Languages

C# | Go | Typescript

Technologies

AWS | Azure Cloud | Bash | Docker | Express | Git | MySQL | .NET Core | Node.js | React | SQL Server | Vercel | WPF

EXPERIENCE

Lead Software Engineer — **Oct 2024 - Present**

Rootz • Startup — *Salt Lake City, UT*

- Led the planning, development and execution of Web3-related projects by planning and prioriti ng business requirements
- Developed and maintained a DApp for transaction analysis and secure document transmission ar l verification using Vercel, NextJS, TursoDB, Safe Global API, ThirdWeb API, and cryptographic hashing libraries

Software Engineer — **Jan 2022 - Present**

University of Utah • USS Northstar Team — *Salt Lake City, UT*

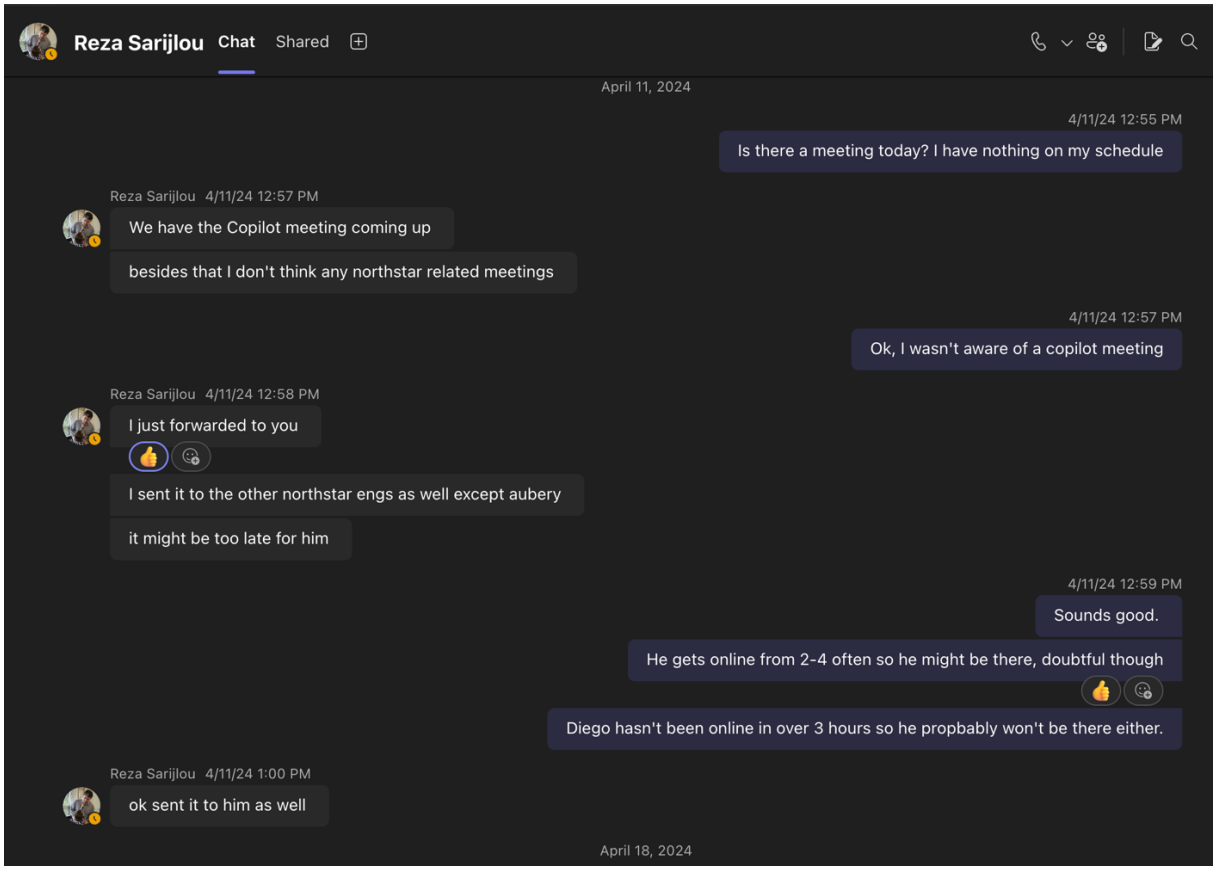

- Led the development and execution of redesigning several login systems to use Auth0 SSO (Singl Sign On) for a seamless user experience using Azure Active Directory and Google Cloud across all our applicatio ns
- Developed and designed scalable backend services for a Student & Staff Management System th at is used by thousands of users in the state of Utah
- Designed and maintained database schemas, stored procedures, views and services using SQL Ser er to provide enterprise features and fulfill business requirements for several technical colleges

Lead Software Engineer — **Oct 2022 - Jun 2023**

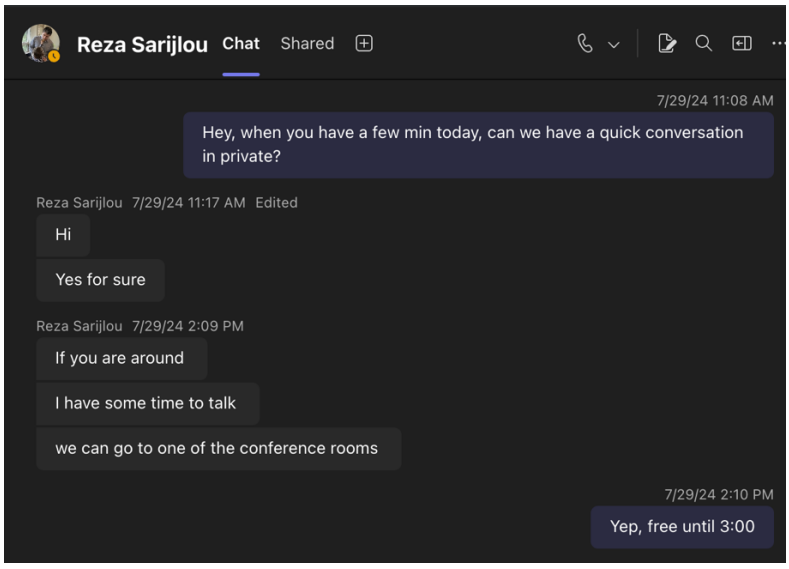

FlowStreet • Startup — *Salt Lake City, UT*

- Led the planning and execution of software development projects, including prioritizing tasks, allocating re- sources, and ensuring timely delivery of milestones
- Led the development and implementation of multiple REST APIs resulting in efficient and scalable backends utilizing Azure Cloud services, NodeJS and Typescript

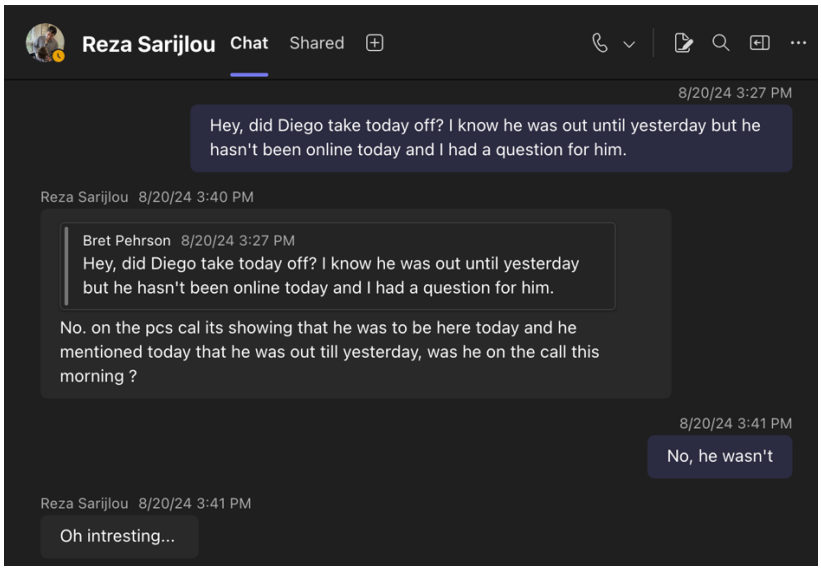

On April 11, 2024, I asked Reza if there was a meeting that day because I didn't have anything on my schedule. He sent me the invite and said he invited the whole team but I informed him that Diego had been offline for over 3 hours and probably wouldn't see the meeting. Instead of trying to find out why Diego was offline and not working, he just mentioned that he added Aubrey to the meeting since I let him know that Aubrey gets online in the afternoons.

This behavior kept going on for a few months and I noticed that Diego's tickets were taking a while to be completed. He was constantly working on his personal machine while in the office and Michael Andrade and I would talk about how he ignores this job. I asked Reza if we could meet in Private to discuss it, which we did. He said he would take care of it.

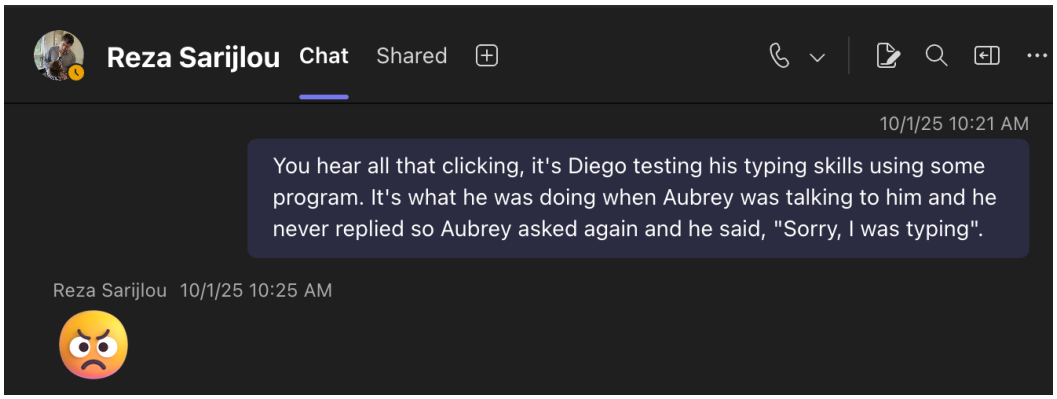

The next month, I noticed that Diego had been offline all day so I asked Reza if he knew where he was. He asked if he was on our Tuesday morning call that we have every week but he was not. All Reza had to say was, “Oh, interesting….”

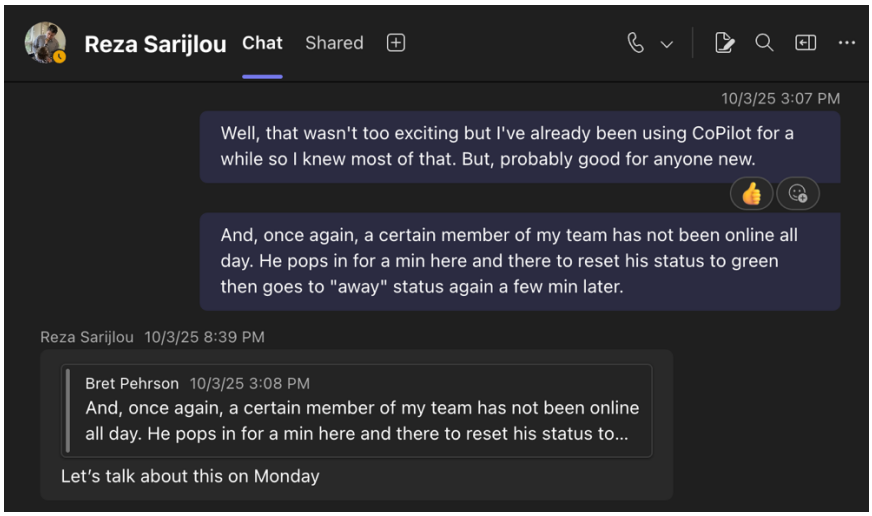

A few months after Diego started a new job with the startup Rootz, Deigo added to his Calendar an event on Monday and Wednesday at 11:00 am, the two days we are required to be in the office. The event shows he is “free”, which I found weird and I do not know what the event was for but I do know that every Monday and Wednesday when we were required to be in the office, he took a conference call with his other job at 11:00 am. I am attaching screen shots of his calendar to show that these events have been there since March of 2025 and continues on today. In January and February, he had similar events that shows “Free” but at random times. A copy of his calendars can be found at the bottom of this document.

When Diego started taking conference calls from his desk is when I really noticed that he was working his other job while at the U. Every day that he would come into the office, he would set up his work laptop and his personal laptop. At times he has music videos playing on his personal machine but I didn’t pay much attention to what he was doing. But, when the conference calls started, he would have Norhtstar code up on his monitor while taking a conference call on his personal machine. There was one day when he was on a call and Michael Andrade, Northstar Developer, and Sither Dolma, Northstar Analyst, and I were talking and were laughing about something and he turned and gave us a death glare. I walked over and told Reza that he has no right to get mad at us when he is on a call for another job. Reza agreed but didn’t say anything to Diego, at least that I know of.

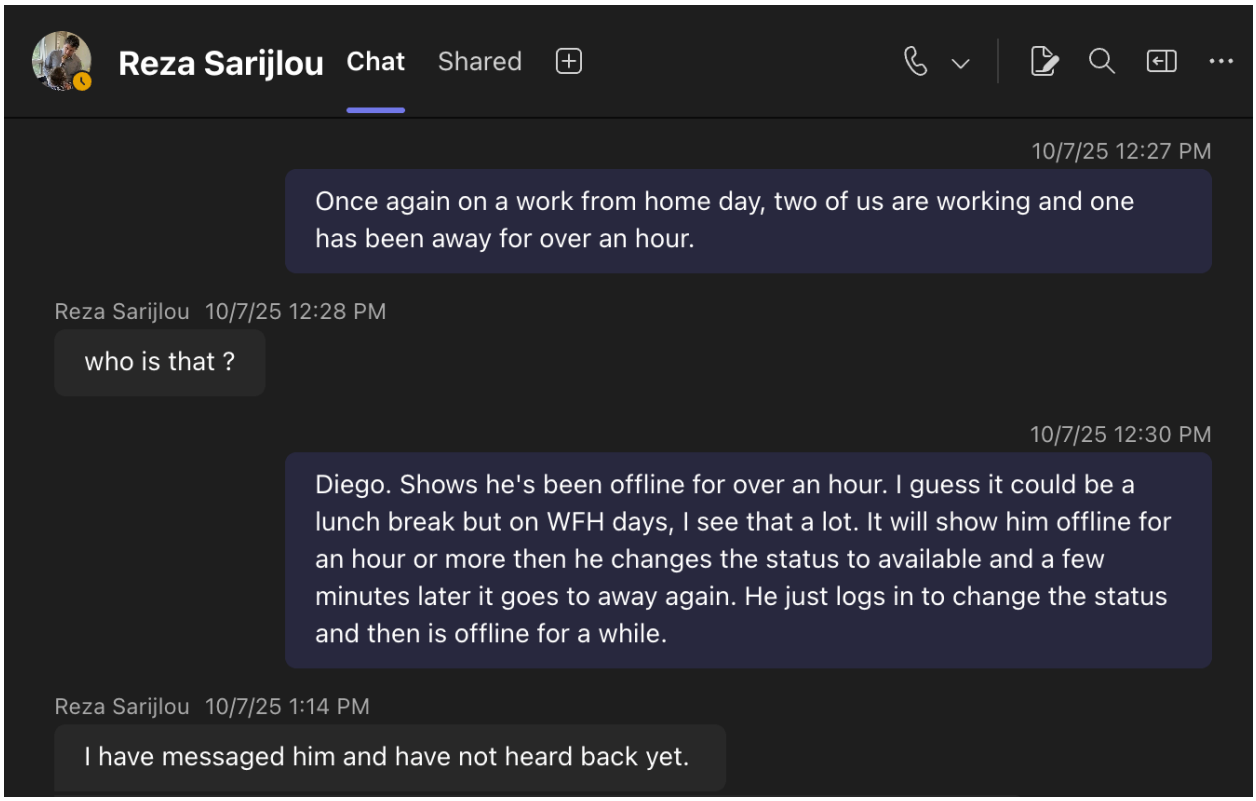

Diego liked having bizarre keyboards and was bringing in a few different ones to try out. They were the type where you snap together pieces and set it up in different ways. He downloaded typing software, or maybe it was just a website, to practice getting used to the new keyboard. He would use that software for close to an hour each day. We all knew when he was practicing because the keys clicked very loud. We were in a meeting on October 1, 2025, and Diego wasn't paying any attention because he was practicing his typing again. Aubrey Schrag, Northstar developer, asked Diego a question but he never responded, just keys clacking. Aubrey asked again and then asked if Diego was still on the call so I turned and told Diego that Aubrey was talking to him. Reza was on the call but I still let him know what happen. Reza just gave a mad emoji face instead of coming over and telling Diego to stop with the typing.

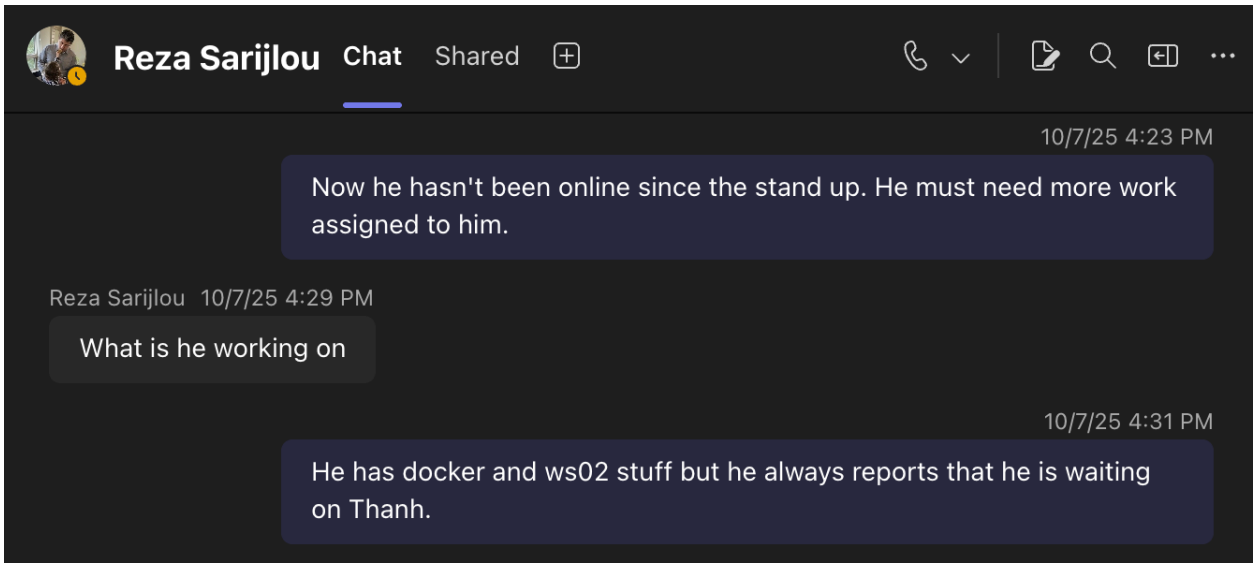

On Friday, October 3, 2025, Diego was out almost a day. He would occasionally move his mouse to reset his away status but he hadn't been working. I messaged Reza at 3:07 pm but he never replied until 8:39 pm and said that we will talk on Monday which we never did.

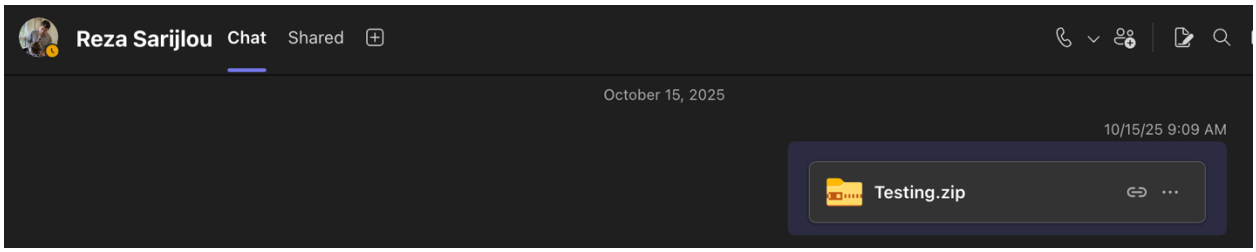

I messaged Reza on October 7, 2025, to let him know that Diego was once again away for a while. It had only been an hour at that point but Reza messaged him and hadn't heard back, just another Friday.

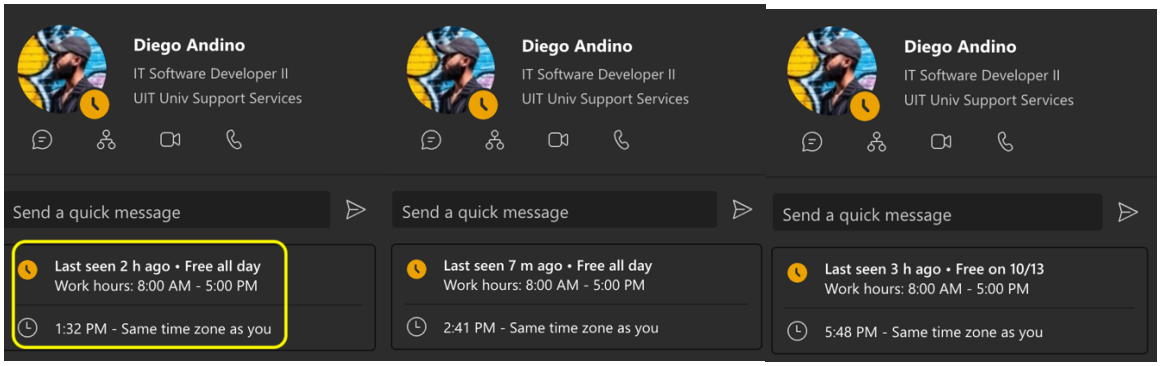

We have a standup meeting every Tuesday and Thursday at 2:15 that last anywhere from 15 – 30 min. Diego often logs in for the meeting then calls it quits for the day. I let Reza know that he did it again on October 7, 2025. For a few weeks, Diego would say his tickets were waiting on Thanh so he had nothing to report. If that's the case, he could have picked up other tickets to work on. I mentioned it to Reza but nothing came of it.

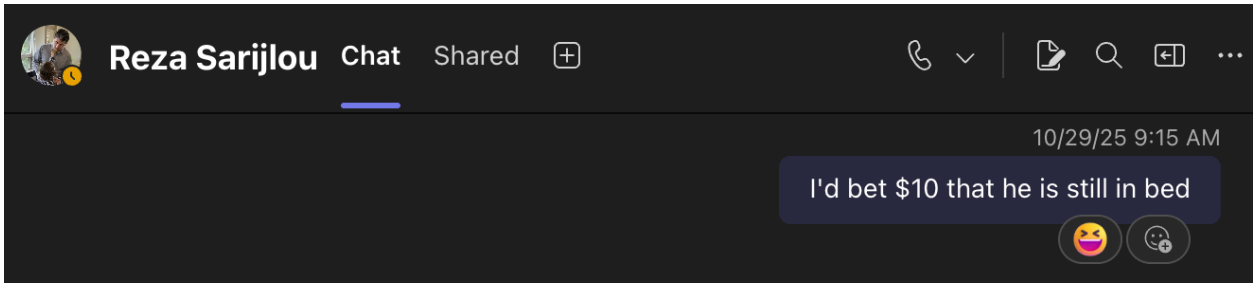

On October 15, 2025, we were working in the office but I noticed that Diego was on his personal machine most of the day or had walked away from his desk for hours. I walked over and told Reza that Diego is here but hasn't been working all day. He asked me to monitor him and send him any evidence in Teams. I sent him a zip file with these images. I only started to monitor him later in the day and didn't get a screen shot from earlier.

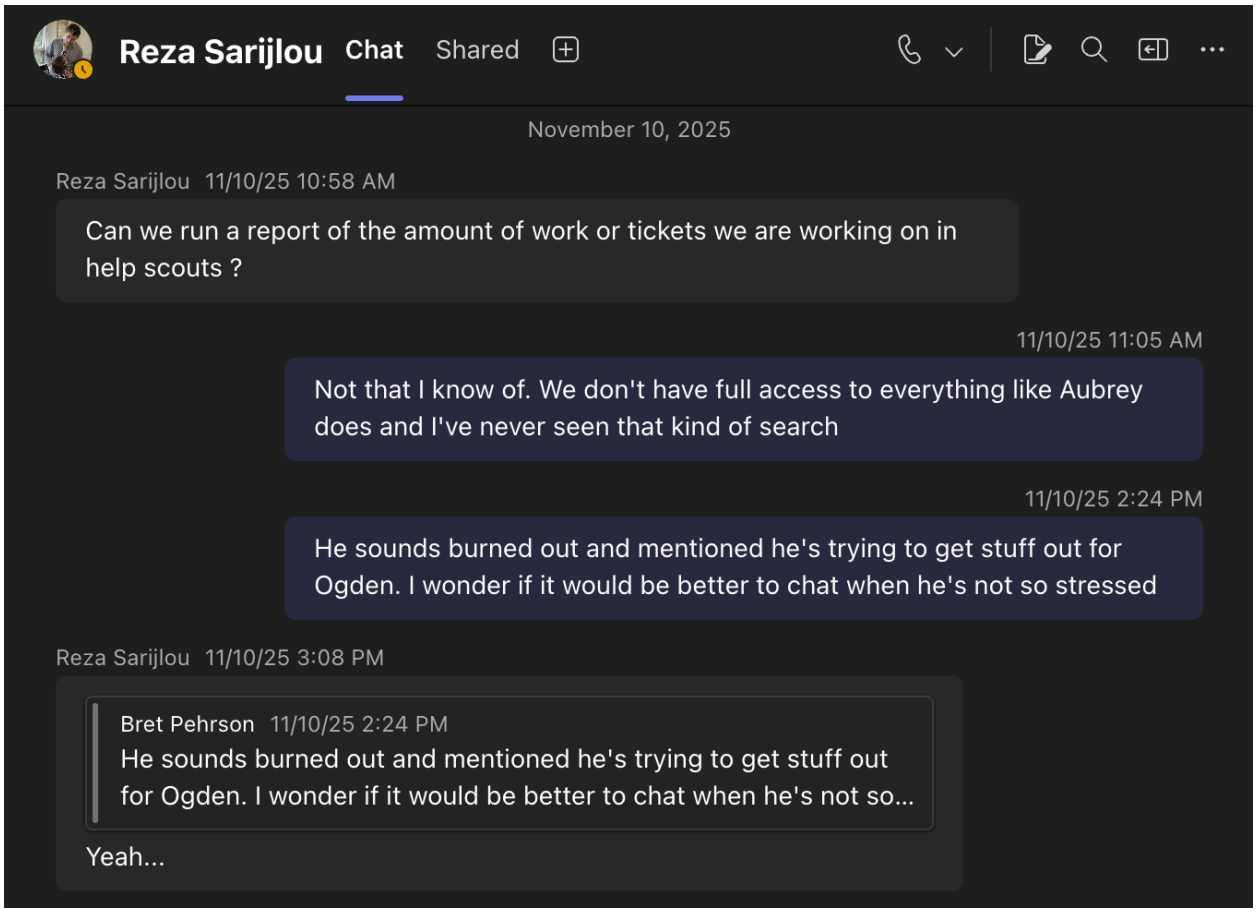

On October 29, 2025, we were supposed to be having a sprint planning meeting at 9:00 am. Diego had not joined the call and Reza said on the call that he would message him. I messaged Reza and said that I bet he's still in bed and Reza put a laughing face on it, I didn't find it funny. He does stuff like this because he never gets in trouble for his actions.

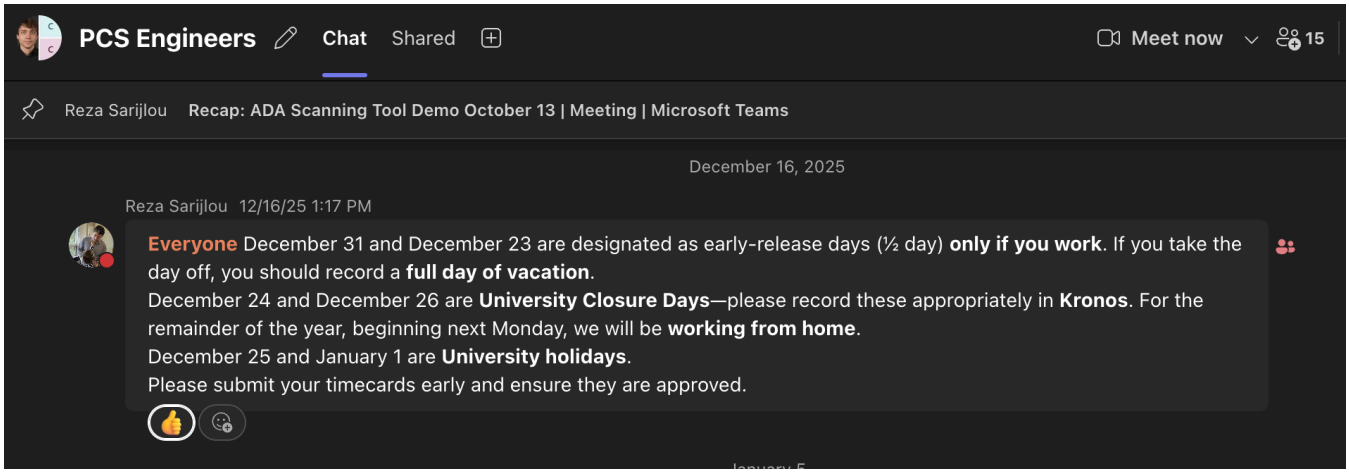

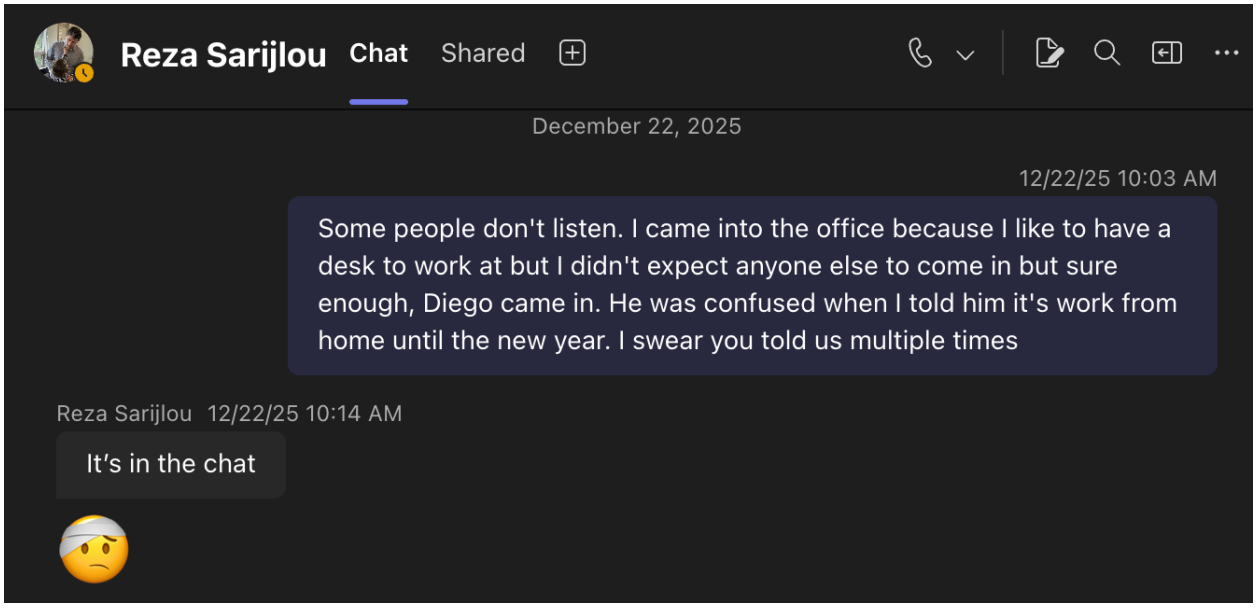

Finally, after months of telling Reza know that we have an issue with Diego, he scheduled a meeting with Aubrey Schrag on November 10, 2025, to discuss what is going on. Aubrey was in the dark about the meeting but it was spurred because I brought Reza over to my desk and showed him the number of tickets that Diego has worked, how much code he had done in the past few months and Diego constantly being out of the office. Reza's thought process was that Diego doesn't have enough to work on and wanted to get input from Aubrey about what we can do. Right before the meeting, Reza asked me if there is a report we can run to see how many HelpScout tickets Diego has worked. The access I had didn't have that option but I was showing Reza that in the 4 years that Diego had worked here, he had only completed 32 HelpScout tickets whereas I had completed close to 200. Diego does nothing to join in and help out with the day-to-day processes of Northstar, he only works on code for tickets assigned to him and never looks for extra work when he is slow. In the meeting with Aubrey, Reza was talking about him using his personal machine at his desk, taking conference calls and not producing much code. Aubrey was planning on going on vacation the next day and was way too busy to take the call and was irritated with everything he was hearing. He finally spoke up and said, "I don't know what you want me to do about it. I'm not his manager and have no authority over what

he does. Tell him he can’t bring in his personal machine into the office and make him work his hours.” We ended the call with no resolution.

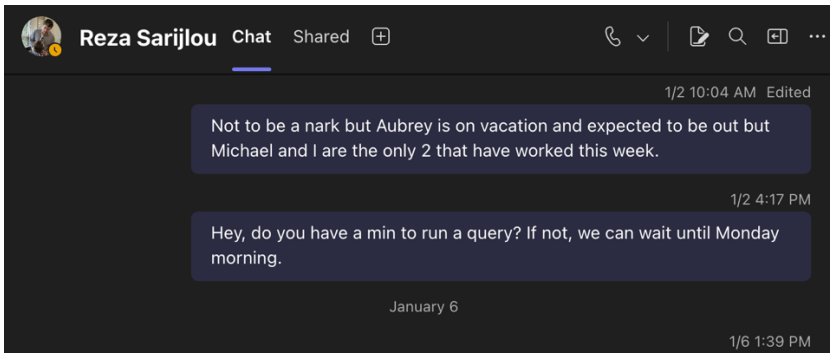

In our staff meetings, there are many times when Reza will ask Diego a question and you get no answer. He logs in and then never pays attention. Reza told us in our Thursday staff meeting that they approved everyone to work from home the week of Christmas. He sent out a message on December 16 with all the information we need to know about the Holiday schedules. I went in on December 22, 2025 because I live in a small studio with no space for a home office and enjoy being able to have my big desk and monitor and out of nowhere, Diego showed up. He asked where everyone was but I told him that it was WFH that week. He was confused and asked when that happened and I told him there were Teams messages and we talked about it in the last staff meeting. I message Reza and told him that Diego never listens or pays attention. You can see the message Reza sent on December 16, 2025, “beginning next Monday, we will be working from home.” Diego was the only person not paying attention and came in.

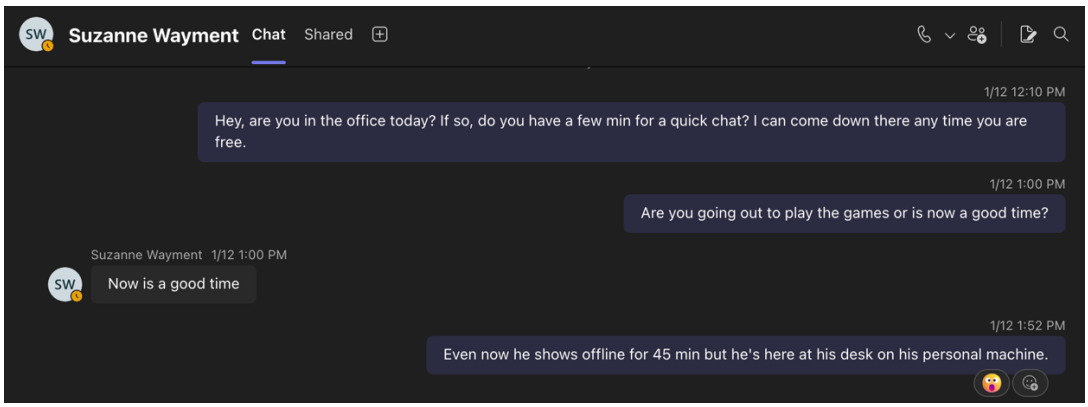

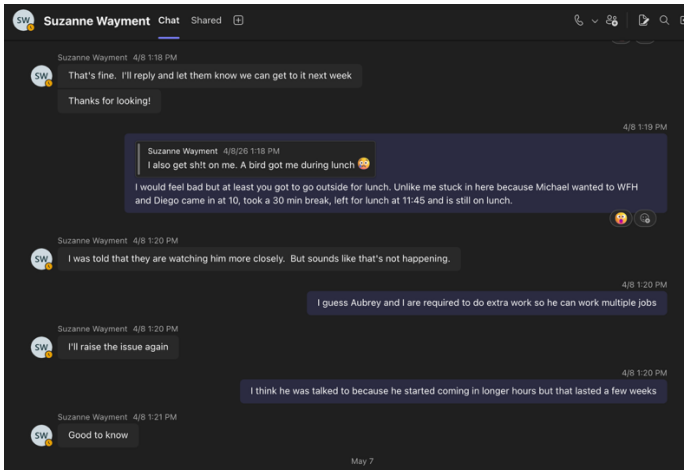

On January 2, 2026, I noticed that Diego hadn't worked all week. With the holiday schedules and people out, Diego took advantage of the fact that no one was paying attention if he worked or not. Michael Andrade and I knew though so I informed Reza. Reza never once responded or asked any follow up questions about it. I think the non response from Reza was the reason he could get away with it. He never even repsonded to my next message asking him to run a query.

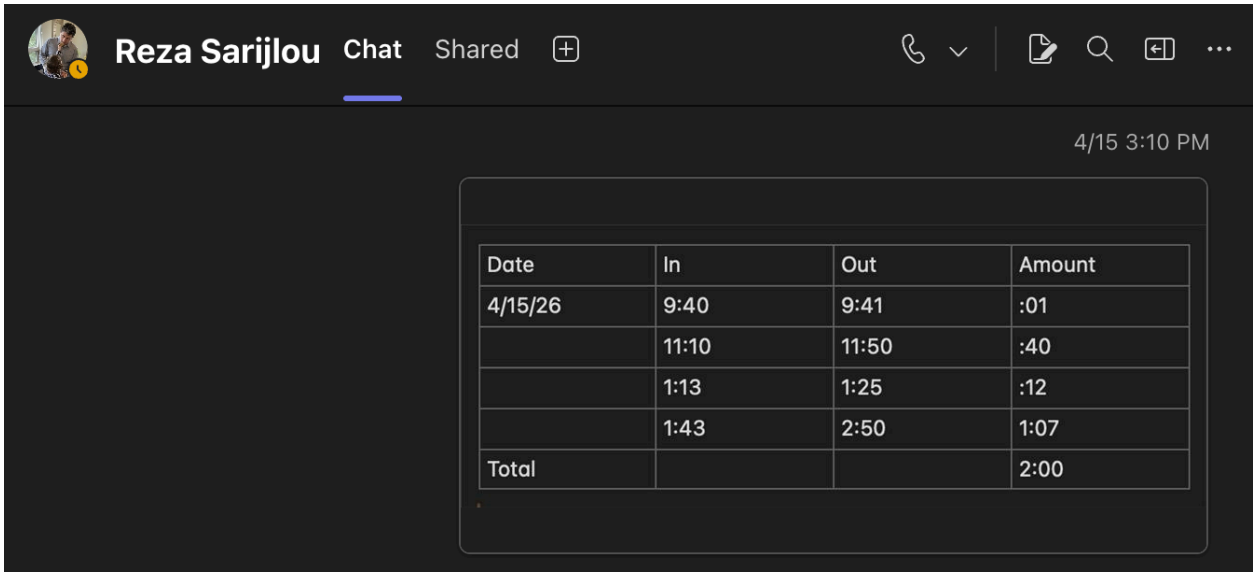

On January 1, 2026, I message Suzanne Wayment (Director IT), who has been assigned to be the direct contact person with the Utah Technical Colleges (Utech), the Utah System of Higher Education (USHE) and our team, Northstar. I asked if we could chat because I was tired of going to Reza over and over and reporting issues about Diego and nothing ever happening. It was also a week after Diego skipped out of work for over and week and Reza never responded to me. I told her that I was looking for advice on what to do or what steps to take. I took my laptop down and showed her some messages I sent, the amount of Helpscout tickets that each member of the team had worked and the lack of code that had been pushed to the repository. We talked for a while about him not helping out on the team much when it comes to the day-to-day processes to keep our product running. She was a bit shocked, especially because the evidence was undeniable. She didn't ask for me to send her any evidence but told me that she was going to speak with a few people and hopefully bring light to the situation.

On April 8, 2026, there was an issue with the schools that Suzanne and I were frantically trying to fix. After we finished, I replied about her getting to go to lunch. I joked about how nice it must be to take a lunch while I am stuck in the office because Michael Andrade decided to work from home and Diego showed up at 10:00 am, took a 30 min coffee break and then left for lunch at 11:45 and had not returned yet and it was 1:19 pm. She told me that they were watching him a little more closely but that she would raise the issue again.

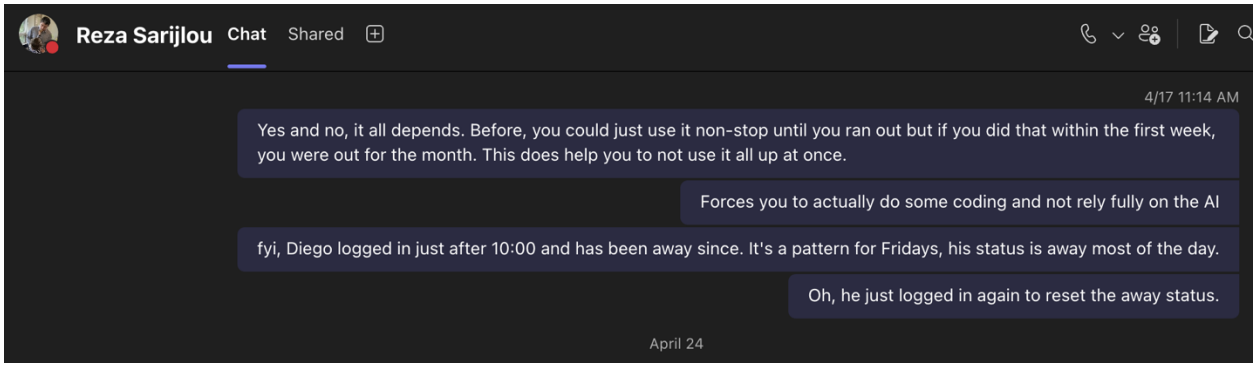

On April 15, 2026, Reza asked if Diego had come in yet because it was going on 11:00. I told him that he popped in at 9:40, dropped his stuff and left and was still gone. Reza asked me to let him know if he actually works that day so I wrote down the times when he was in and out and sent it to Reza.

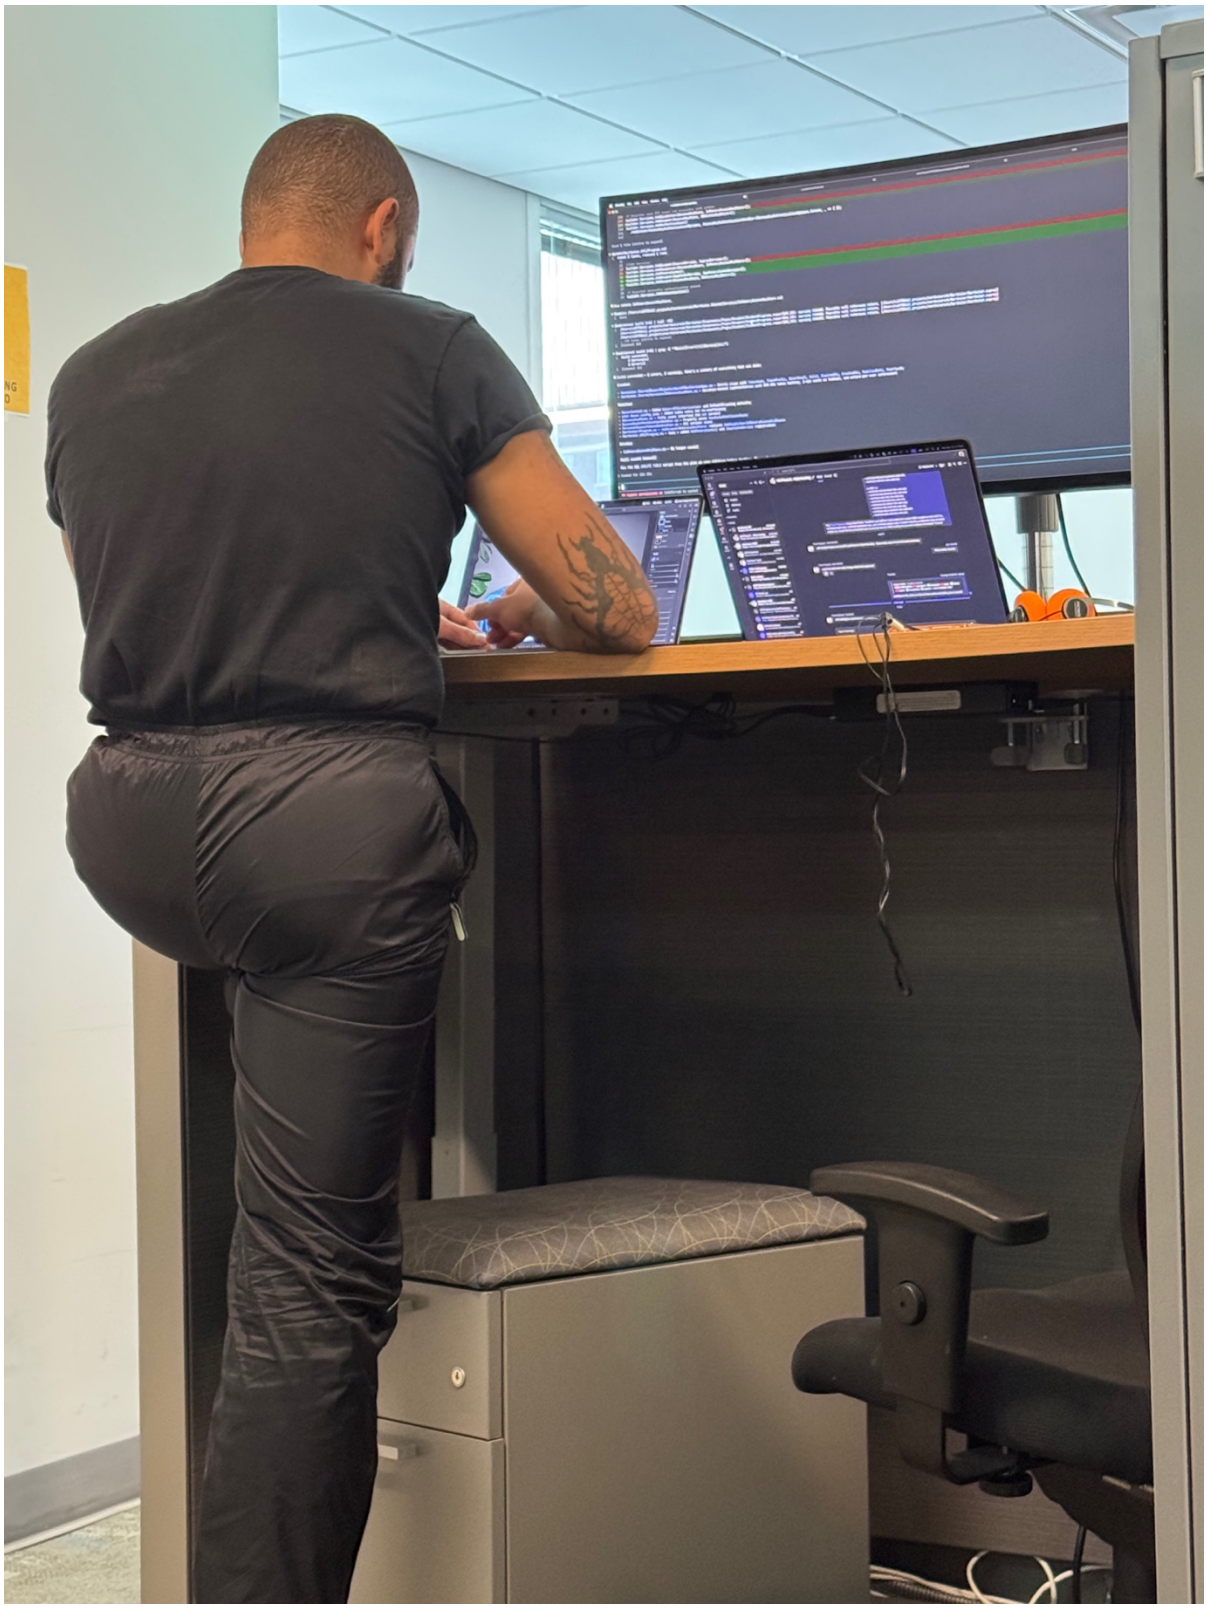

Date	In	Out	Amount
4/15/26	9:40	9:41	:01
	11:10	11:50	:40
	1:13	1:25	:12
	1:43	2:50	1:07
Total			2:00

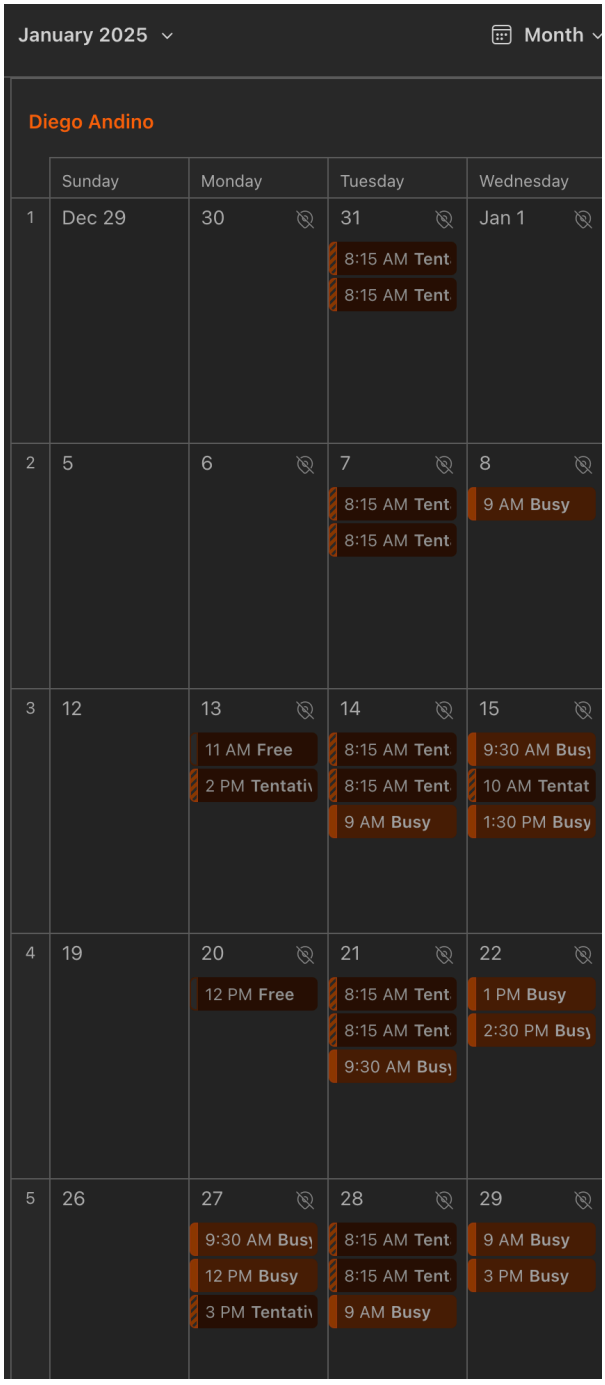

Then on April 17, 2025, Reza and I were talking about AI stuff when I mentioned that Diego had logged in at 10:00 am and then instantly went to away status. I once again informed him that this is a pattern. He never replied again.

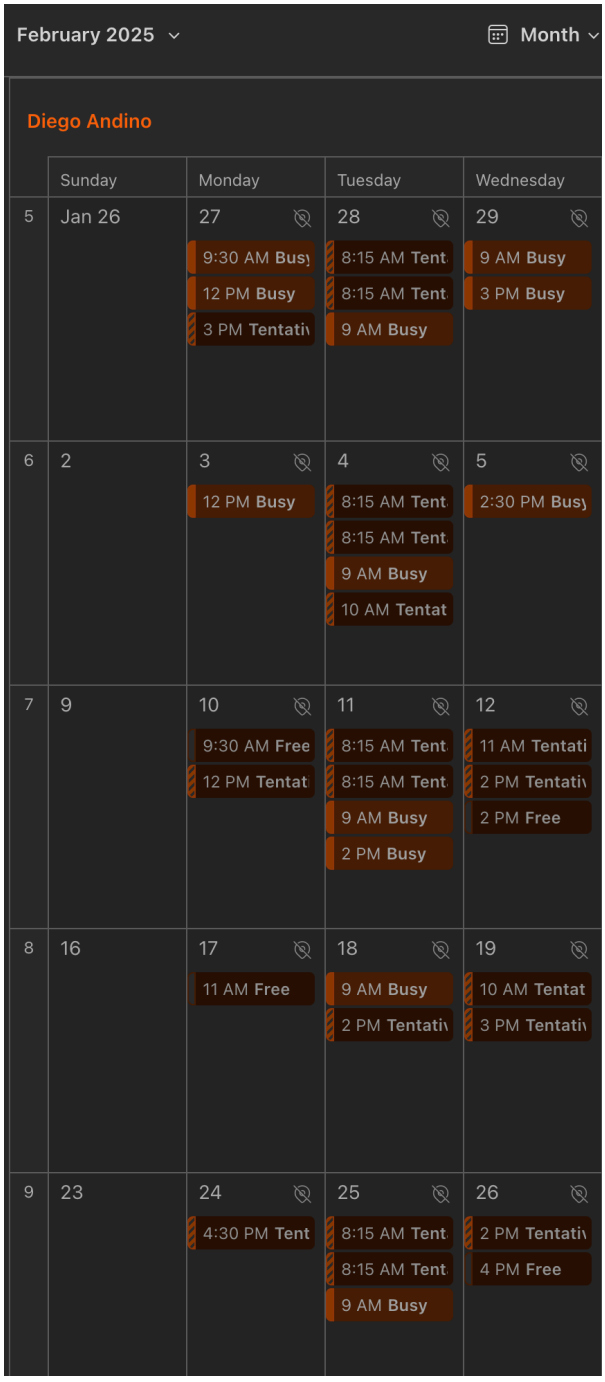

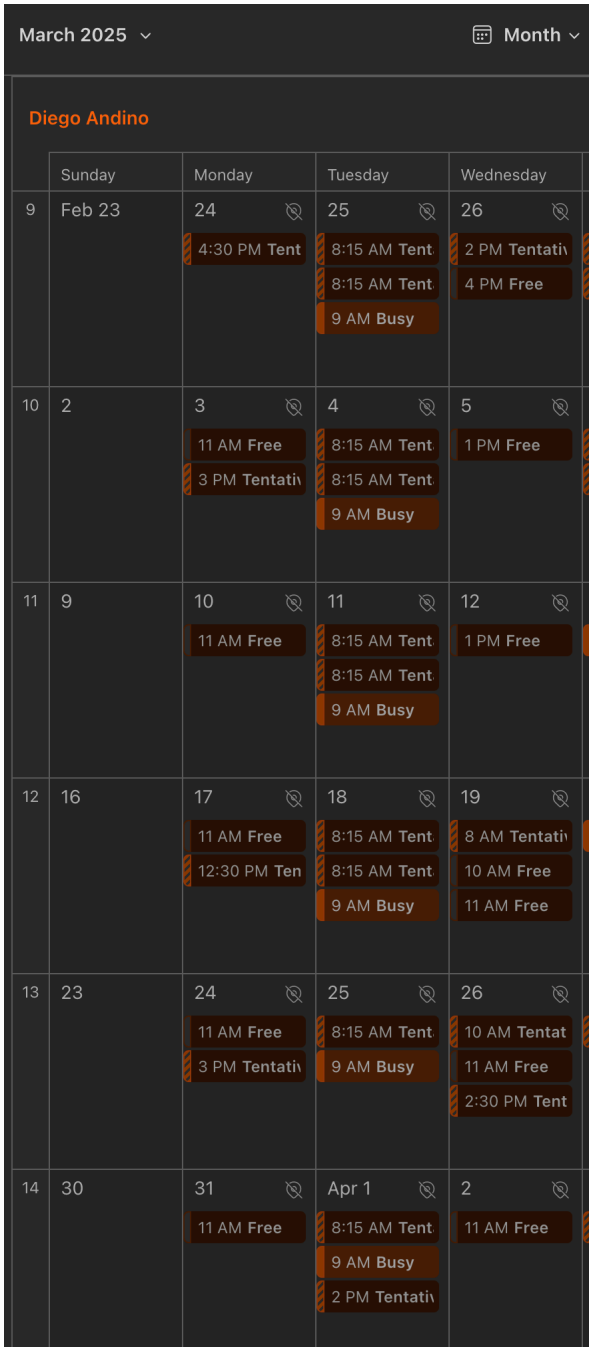

Here is an image I took of Diego working in the office on his personal machine while his university laptop sat open next to him.

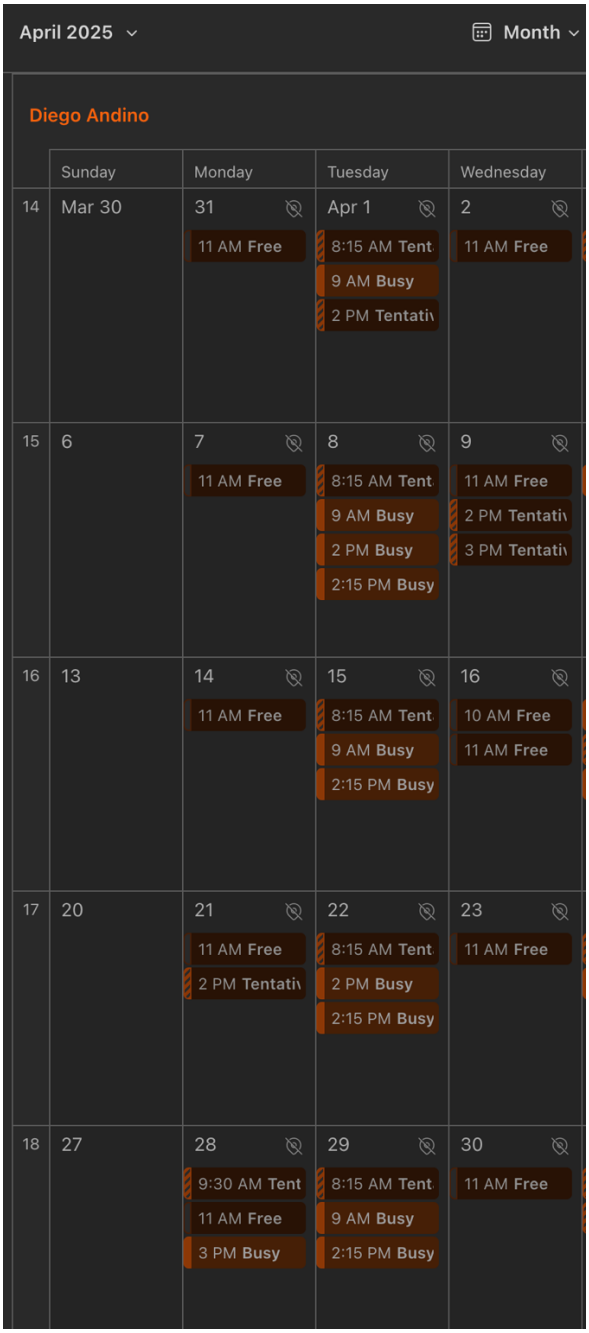

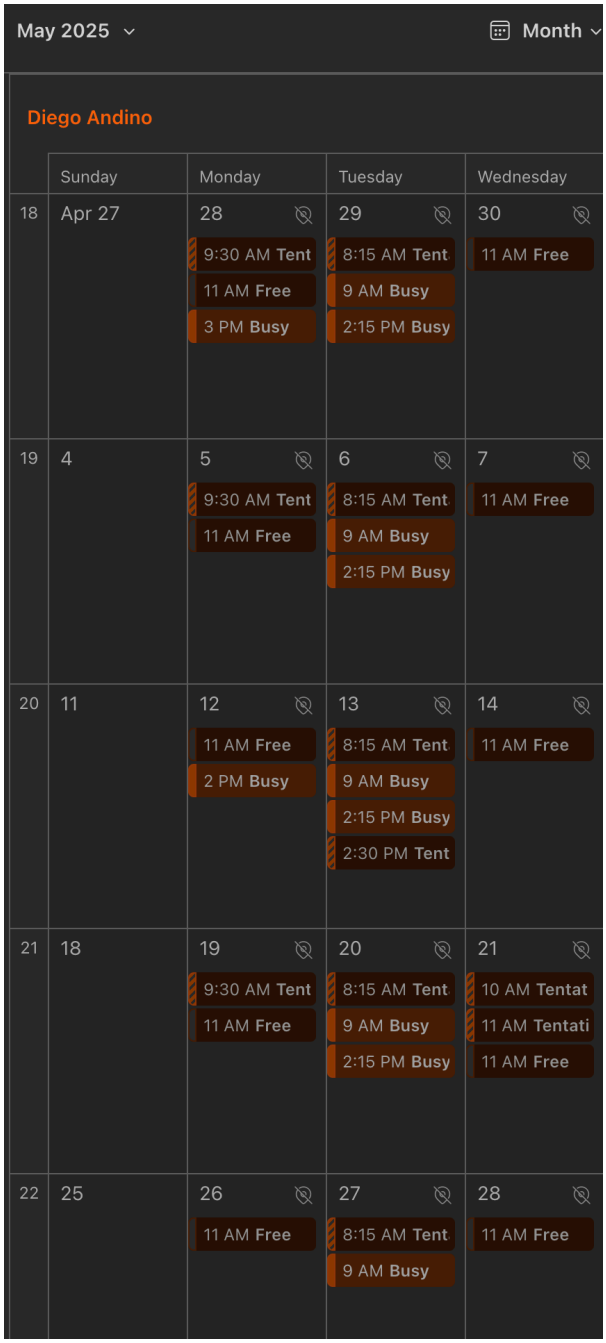

Diego’s calendar showing he scheduled a meeting staring in March 2025 every Monday and Wednesday at 11:00 am to show him as unavailable so he can take a conference call with his other company.
